

SHAREU

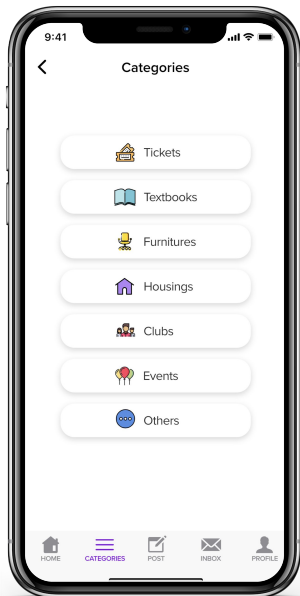

DESIGN STATEMENT

ShareU provides a solution for difficulty spreading information on campus for university students. Our app organizes information such as events, clubs, tickets, textbooks, housing to verified students in one centralized platform.

The ShareU Home contains an organized news feed and a search function with filtered search results.

The Categories page provides an organized and straight forward categories menu design.

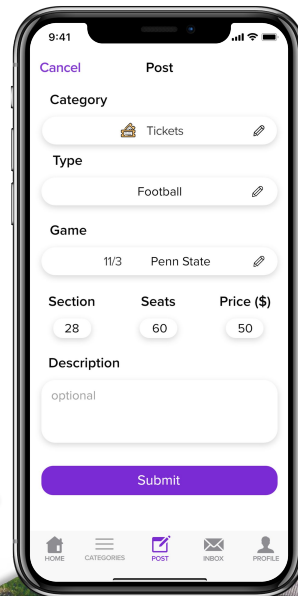

WHAT WE ARE EXCITED ABOUT

Since there is a unified form for posts, the posts are easily filtered rather than other platforms that are just a large field of text.

Not only can users sell and exchange items, but they can learn about events and clubs and become more involved in their campus community.

Posts have a unified form which reduces user effort and already provides the exact information needed.

The Profile displays contact information and reviews from other people, which verifies university status.
